SAPPHIRE
SALT & SPICE

FOR RYAN · FROM JIMMY

Your salt, shown off

A quick look at what I changed and the new products I'd love to add. None of it is final until you say yes.

BEFORE

NOW

- **Clear labels** so the crystals show through. The salt is the best advertisement we have.
- **Laser-engraved lids.** Each walnut lid has the product's name burned into the top. When the jars are all in a kitchen drawer, you can find Gut Health or Ember Steak at a glance.
- **Five sapphires for the logo,** in sapphire blue. It matches the name and stays sharp on a lid or a travel stick.
- **Sapphire Salt & Spice,** so the name grows with the line.
- **Still yours:** the salt, all five blends and their ingredients, your jars and walnut lids, the display, the waves, a color for each blend, and your prices.
